		EVALUATION	18
	5.9	* Perform SUMMATIVE EVALUATION of the USABILITY of the USER INTERFACE	19

Content of use specification

- intended medical indication
- intended groups of patients (may contain age groups, weight ranges, health conditions or physical fitness)
- intended part of the body or type of tissue applied to or interacted with
- intended user profile
- intended use environment
- operating principle

Use scenario

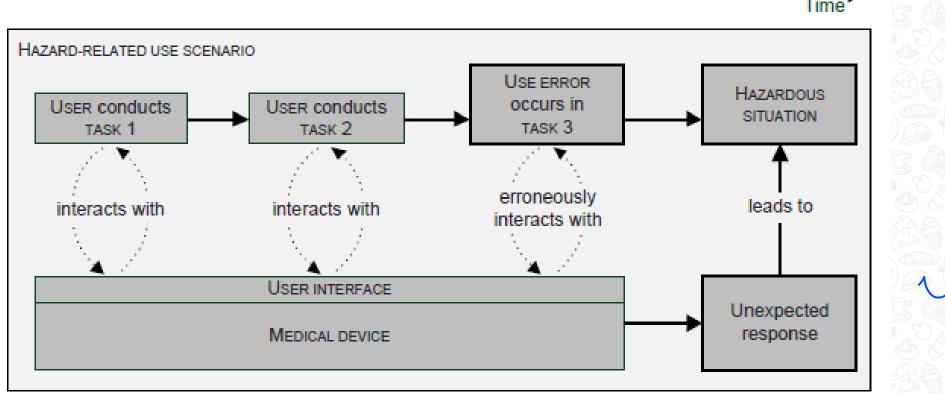

3 Steps > Gret result

10-63266 - Usage Guideline

Use scenario with use error

with eroof

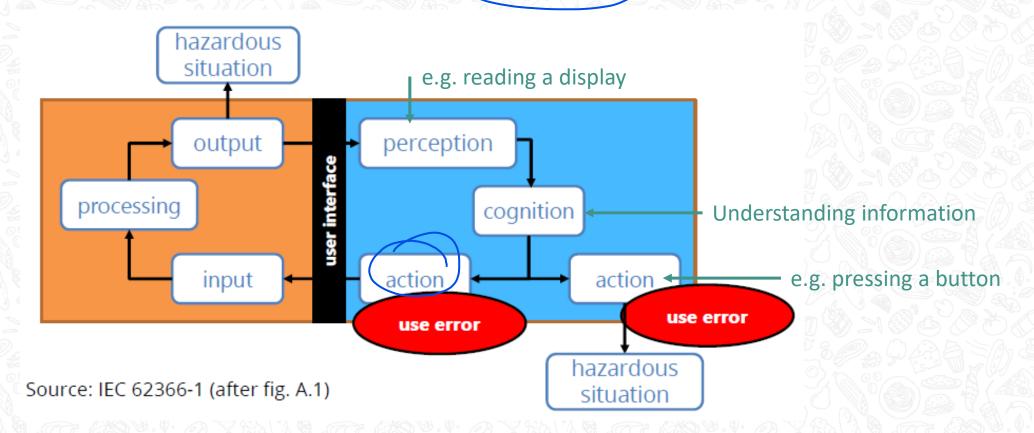

vnergeets.

Perception-Cognition-Action Model

Helps to identify the causes of use errors

At every step -> usability fishy.

Usability evaluation strategy

Usability Test

Usability Test

- According to IEC 62366-1:
 - method for exploring or evaluating a user interface with intended users within a specified intended use environment
- Additional criteria:
 - realistic test assignments in a realistic scenario

Usability Test

- 2 test scenarios
- We provide English translations

Hands on

Test case 1: App installation & navigation

Data privacy

Test case 2: Documentation of meal & symptoms

Translations for dishes
